

In order to meet the safety requirements of our company, to allow a fast and safe unloading and to save waiting time, we ask you to comply with the following guidelines when loading vehicles:

- 1) For sheet metal, it is necessary to use wood with a minimum thickness of 7 cm as a support and intermediate layer, because our forklift forks have a height of 7 cm. The sheet metal package may contain max. 3 to heavy and 90 mm high.
- 2) For rod material, base wood of at least 7 cm height is necessary. Be sure to use a distance of at least 5 cm between the collars.
- 3) The handling weight limit of our crane is 5 tons. Therefore, it is important that the bundles do not exceed this weight.
- 4) Lifting gears has to be attachable on our own. We are not allowed to use the equipment attached by the supplier because of safety reasons.
- 5) The completeness of the delivery documents and certificates must be ensured.

Loading examples:

In addition, the proper securing of the cargo has to be guaranteed.

In case of non-compliance, we reserve the right to refuse the goods.

You will find our currently loading and unloading times on our website: <https://www.gabo-stahl.de/en/contact>. Deviations of these loading times can only be done by prior arrangement.

Any additional costs resulting from wrong loading will be charged to the supplier.
